## RoHS Directive (2002/95/EC)

To PTC Traffic Ltd Customers

PTC has made strenuous efforts in order to comply with the Restriction of Hazardous Substances in Electrical and Electronic Equipment (RoHS) Directive 2002/95/EC.

The RoHS directive stipulates that lead, mercury, cadmium, hexavalent chromium, polybrominated diphenyl ether and polybrominated biphenyls are banned from new electrical and electronic equipment as of July 1st, 2006.

By eliminating these substances from new equipment the RoHS directive complements the Waste Electrical and Electronic Equipment (WEEE) Directive 2002/96/EC. The WEEE directive includes substances most of which are not used in electrical connectors.

The maximum concentration values in homogenous materials do not exceed 0.1% for lead (Pb), mercury (Hg), hexavalent chromium (Cr VI), and polybrominated diphenyl ether (PBDE) and polybrominated biphenyls (PBB) including decaBDE and 0.01% cadmium (Cd) by weight. Lead (Pb) contained does not exceed the exemption no.6 which allows lead (Pb) as an alloying element in steel containing up to 0.35% lead (Pb) by weight, aluminium containing up to 0.4% lead (Pb) by weight and as a copper alloy containing up to 4% lead (Pb) by weight. DecaBDE are not used so the decaBDE exemption no. 10 annulment has no effect upon WECO product.

All of PTC Traffic Ltd products are fully RoHS compliant
